DE DOBLE EFECTO

PNEUMATIC ACTUATORS

Gears and material

High Technology

Light weight, simply structure, easy maintenance, long working life

High Precision

High precision bearings, high-strength piston, high density output shaft

Very Reliable

Stroke adjustment, flexible opening and closing

Wide range of Adaptability

Replaceable seal, wide temperature adaptability

Installation and application

1. Must clean up the inside of pneumatic actuator. If there is any impurity exists in the fluid, please install the filter valve on the pipeline.
2. When installing pneumatic actuators, ensure the time required for maintenance and disassembly of various components.
3. The window must not collide with hard objects.
4. Check the model and parameters of pneumatic actuator whether it meet the technical requirements for on-site installation.
5. Check the cylinder and position indicator of pneumatic actuator, ensure there is no damage.
6. If a solenoid valve is installed, the joint should be well sealed.
